POLICY OF QUALITY AND SAFETY INFORMATION

The company Page d.o.o realizes the vision and set mission through professional work and application of modern methods in the field of consulting, design, implementation and maintenance of software products in the field of information and communication technologies and Cyber Security. Establishing new value chains in the digital ecosystem, and providing high quality products and services, as well as tailor-made solutions - turnkey system, lead us to the goal of becoming a globally recognizable company, which puts customers and meeting their needs, as well as establishing a healthy and fair relationship.

ISO 9001 : 2015

In line with our mission and goals:

- ❖ We have adopted a Quality Management System in accordance with the international standard ISO 9001: 2015, which is implemented in all business sectors of our organization.
- ❖ We provide the necessary resources for the implementation of the Quality Management System: acquired knowledge and experience, appropriately trained workers and the necessary material and technical resources.
- ❖ We build partnerships with suppliers through mutual trust, and clear and open communication.
- ❖ We build fair relationships with customers respecting the agreed terms of delivery, as well as all their requirements in order to meet their expectations and mutual satisfaction.
- ❖ We invest in continuous training, information and training of our employees in order to meet and meet the requirements of all clients of the company.
- ❖ We determine quality goals, and we check the degree of their achievement, through an internal system of work within certain time limits. At the same time, we monitor, measure, analyze, and act preventively on all potential risks in business, to ensure the best possible quality of products and services.

ISO 27001 : 2013

The company's management has established, implemented and maintains an information security management policy that:

- ❖ meets the information security requirements of customers and other stakeholders, and classifies and protects all types of data from unauthorized access;
- ❖ improves its plans and activities, and introduces a higher degree of responsibility within the company;
- ❖ achieves the goals of information security, and undertakes the necessary preventive activities to protect data and information from loss;
- ❖ is in accordance with regulations, laws, contractual obligations and expectations of stakeholders;
- ❖ manages information assets in an organized manner so as to facilitate continuous improvement and adjustment to current business and other objectives.

The company's management constantly monitors, reviews and directs the activities of all organizational units and individuals, so that this IMS quality policy is fully achievable in everyday business.

In this sense, all employees are fully acquainted with the established policy and use all available resources to constantly achieve and improve its goals.
